Painting, washes, feather flicking, and burning. Details on composition, design, proportion and balance, and step-by-step photos with detailed captions.

I purchased this for my husband, who is looking to expand his repertoire of songbird carving. He really likes the book. Good patterns and painting details. The only downside is that not all the pictures are in color.

I am fairly new at wood carving, and find the book very beneficial. It has great illustrations and directions for carving and woodturning very realistic birds. A friend of mine that has been carving for over thirty-five years said much of what he has learn came from this book. He just finished the downey woodpecker using this book for step-by-step directions. His downey looks like it is ready to fly away.

Bought this book "used". Nice price, great condition. I would order from this supplier again without reservation. Great reference book for the serious wood carver. Well illustrated. Very detailed explanation of techniques.

great book on craving song birds, was great at give ideas and ways I have never thought of
