Grade Level: 4 - 6

Customer Reviews

Marc Tyler Nobleman is the author of over 40 books for children, including the Activities for Fast Finishers series, and 5-Minute Daily Practice: Writing (Scholastic Teaching Resources). He writes regulary for magazines including Nickelodeon, several Weekly Reader imprints, and Storyworks. Marc is also a cartoonist whose single panels have appeared in over 100 magazines including the Wall Street Journal, Good Housekeeping, and Forbes. Marc lives in New York City.

I found this book to be a wonderful way to include great words in my third grader's weekly lessons. He loves the cartoons and they seem to help him remember the words as well as automatically use them in his daily conversations. Wonderful, straight to the point book!

My 7 year old is learning and retaining the words that are in this book even weeks later. The long term effects are still unknown but I like that it provides exposure to big words. My only criticism would be to provide more rationale in the use of the words and order in the book. I think this would help kids link the information rather than providing words randomly.

I agree that the book needs an index, or at least arrangement of the words in alphabetical order. I also think some of the words are too esoteric to be useful (e.g., pulchritude--when was the last time you saw it used?). However, I find students retain words from cartoon vocabulary books--this one and others--much more than straight text books. Also, the cartoons are G-rated, unlike those in other cartoon vocabulary books. The words are a little abstract for elementary students, but 6th graders and up will be ready. It's also good for SAT, SSAT, and ISEE preparation.

This book gives you so many vocabulary cartoons and the complexity of the words is perfect for my middle school students. It will also give some of my more creative students inspiration to come up with vocabulary cartoons of their own. I look forward to using it this year.

Very good product

Great product

great ice breaker while you take attendance

I adore these cartoons that increase the vocabulary of my ESL first grade tutee. Diego is so enthralled with knowing how to read, do math, play board games, and read maps. He likes the challenge, and his parents support his learning and achievement in school and at home. In school, Diego already reads well above grade level and his math scores are the same. In order to challenge him, I purchase books as homework, and when I visit, we go over what he has learned and the importance of the knowledge.Although he stumbles with my homework sometimes, he just gets up, dusts himself off mentally, and proceeds. He understands that learning is not instantaneous. Sometimes knowledge takes patience and more study to fully understand and digest.
