BSAVA Textbook Of Veterinary Nursing (BSAVA British Small Animal Veterinary Association)

Synopsis

This new edition builds on the firm foundations laid by Jones's through the years as the mainstay of veterinary nursing training. A new editor and some new contributions bring a fresh eye to much of the content, which has been updated in line with the new RCVS syllabus. All chapters have been reviewed and information has been reorganised as required, to make the book as user-friendly as possible whilst still remaining authoritative. A new section has been added on nursing models, and information on exotic pets has been integrated throughout the book rather than sitting in a stand-alone chapter. There are a wealth of new colour photos and diagrams and the new edition benefits from the tried-and-trusted BSAVA design, which highlights tables and key facts in tinted boxes to aid fast information retrieval.

Customer Reviews

"Laid out in an easy-to-read format... to improve recall. Overall as a single text covering a wide subject area this volume is excellent" | Veterinary Record

This book is great for students studying Vet Nursing. It has everything in it that you are expected to learn. I do not regret this buy at all. It is easy to understand for early nurses and for advanced.

On time delivery. Very good.

The 4th updated edition of BSAVA TEXTBOOK OF VETERINARY NURSING edited by Dick Lane, Barbara Cooper and Lynn Turner provides a text based on the latest veterinary science research and options. Formerly Jones's Animal Nursing, this text will make a perfect classroom assignment for college-level courses: it covers both exotic and small mammal care, expands sections on clinical nutrition and alternative therapies, includes a stand-alone chapter on animal dentistry, and discusses both communication and treatments including standard models of veterinary nursing procedures. Charts and color sidebars of detail make for a quick at-a-glance reference, as well.
