Korean is the easiest Asian language to learn to write. It is phonetic like English and can even be used to write English words. It is even more simple than KATAKANA (A Japanese alphabet for foreign words). Sometimes the Koreans will have basic Chinese characters thrown in with their writing, but that has fallen out of favor. Some very old folks still remember speaking and even writing Japanese, so they know many more Kanji (Chinese Words). This book is good for beginners. I have it. It is also a good refresher. The writing can be learned in a day or so. So put this one under your belt and learn another. In my opinion, Chinese is the most difficult to start, but I also believe it is the most advanced language in the world but takes a long time to master. Neither Japan nor China will admit that they share many words but I know different. Good luck learning, once you start it becomes an addiction.

Explained in detail with lots of illustrations! What I like the most of an ebook is that I can enlarge the letters especially the Hangul letters which are sometimes difficult to distinguish in other books or in a printed book because they are small.

This book makes learning Hangeul easier. Rules and descriptions for writing the letters makes it easy to remember similar characters.

This explanatory book gives purpose to the specific Korean pronunciation. I am better able to visualize accurate pronunciations. Thank-you for this help!

Easy to follow and learn with this book.

This is an easy-to-follow beginners guide to Korean language.

Covers pretty much everything required to understand the alphabet.

I already read and write hangul, I taught myself with the help of printable worksheets and YouTube

videos a few years ago. I bought this book to try to teach my 9 year old niece, after about 5 failures with other books and methods. Not only am I fully confident that she'll enjoy and be able to learn from this book, but I've learned a few things myself, and I'm not even done with it yet. I'm so excited to share this book with her, because she loves the language, but was so frustrated trying to read and write.
