Imagine if you could drive a different sports car *any* sports car *every* single day for a full year. Which ones would you choose? The 365 sports cars profiled in this book range from the awesome to the awful, from the brilliant to the boneheaded, from automotive perfection to vehicular incompetence. Authors John Lamm, Larry Edsall, and Steve Sutcliffe tell the story of each one with humor and reverence, giving you the history, the specs, and the experience of driving some of the greatest and lamest sports cars of all time. How many have you driven?

Whoever coined the phrase "Getting there is half the fun," must have owned a sports car or three. The dude who said, "It's the journey, not the destination," was probably driving a Porsche or a Ferrari at the time. Sports cars are about pure driving pleasure, and *365 Sports Cars You Must Drive* is a celebration of that pleasure.

From hyper-performance German supercars to classic British roadsters, from famed marques such as Ferrari, Porsche, BMW, Mercedes-Benz, Honda, and Chevrolet to all-but-forgotten models like the Cheetah, Bricklin SV-1, and the Crosley Hotshot, authors John Lamm, Larry Edsall, and Steve Sutcliffe put you in the driver's seat of 365 unique sports cars, each with a road to travel, each with a story to tell. How many have you driven?

This is a fun book. There is no great depth in the text explaining the photos but it is all about the pictures. I do offer a slight caveat. More than a few of the facts associated with the photos are incorrect. I noticed at least 6 errors without any need to double check. My theory is that most of the data were found using a simple web search and there was no effort to fact check. Some offenses are simply blatant. For example, the price of a current version Maserati Gran Turismo is listed in what I can only assume as being in Australian dollars or a more direct offense is where an 8 cylinder Lamborghini Jalpa is listed as being a V10). That aside I find myself enjoying the photographs and making mental tick marks as to what cars I want in my garage some day. Even if you cannot read English (in which case you would not be reading this review) this book is a worthwhile and fun purchase for any petrol head if simply for the collection of photos.

This is a good book. I like it not only because there's good information in it about different cars, but it also tells me how fast cars go that I have models of! For example, one of the cars you can find in this book is the Ferrari FXX. That one has a top speed of 243 mph! Another example: the Alpine-Renault A110, which has a top speed of 130 mph. Even if you can't afford even one of the cars in this book, think this: at least you can have good pictures/models of them. Also in this book is the Jaguar XJ220, whose top speed is 220 mph. You can also see the Bugatti Veyron--which has a top speed of 268 mph. And just so many more! A good book to have!

Great photos of numerous high-end cars. The book contains various info about the cars. I have read other review(s) that claim the info is not entirely correct. That doesn't matter a whole lot to me...as long as it's close. I can do further research if I want particulars. The book is good to start conversations and gives you a good idea of what "dream" cars are out there.

Wow! This book has been so much fun for my 14-year old son to look at and read. He loves the pictures and dreams of the day he can really drive one of these cool cars. He loves it and shows it to everyone who also loves cars. If you love sports cars you will absolutely love this book.

Bought for my nephew. He loved it. My kids love it too. Great for kids and adults. Great pics and descriptions of all sorts of cars.

My teenage son is a huge fan of sports cars, especially Lamborghinis and such. He loves flipping through and deciding whether or not he agrees with the decisions made by the authors - and, for the most part, he does. This is a high-quality, truly beautiful book - with all the right cars to make a car-lover happy.

Great summary of the significant sport cars plus a few i didnt expect to see in there as normally fall into the 'forgotten' category.e.g. the Arnolt Bristol.A must have for my collection.I would llike to drive everyone of them, but that wont happen of course.john

I got this book for my 12-year-old son for Christmas, and he LOVES it. Reads it all the time. If you have a kid/teenager who is a sports car fan, this is a great book to buy for them.
