"The gold standard of motion picture technical manuals, this is the only 'must-have' reference book needed to keep on hand for all things pertaining to Grip work. It is a must-read for anyone that steps onto a film set. - Jack Messitt, Cameraman, Bones; Scandal; American Idol

Michael G. Uva is a well-respected key grip in Hollywood, with over 32 years of experience in film, TV, movies, and commercials. Credits include films such as Easy A, Kalifornia, and Iron Eagle, and shows such as The League, Curb Your Enthusiasm, and Bones. He has taught at UCLA's extension program, the Phoenix, Denver, New Mexico, Cuyahoga College Cleveland, and Bakersfield Film Commissions, as well as for the Hollywood CPR Program at West Los Angeles College.

This is a very informative book for anyone that wants to get a general overview of what to expect from the tv/film business as far as the labor aspect is concerned . It let me know what to expect on a shoot and it gave me an overview of the equipment I would be seeing and the lexicon that is used for tools and film equipment . Overall I recommend this book to all just for general knowledge ,but also if you want to get into the business and become a professional in the grip department. This book I believe is essential . Also , it will make you a better grip .

Very informative! As a girl grip this is teaching me all the ropes. I think it will be very essential to my profession as a grip.

Most "film making" books don't bother to go over one of the most important aspects of making a movie: Grip World. I thought I was a pretty experienced film maker until my first day on a real movie set and realized I knew nothing. Although I am working in camera department as a cinematographer, it's critical I understand how to talk to my grip department. This book gave me a head start into learning their language and their tools. It won't teach you everything, and different crews will do things different than what this book teaches, but it's a good start. I have given copies of this book out to many of my crew members who are starting out in "real" movies for the first time

like I was just a few years ago.

Must have book for anyone interested, considering or curious about what the craft of gripping entails. Great resource from a gentleman in the field. Whom I've had the pleasure of meeting.

Really got a grip after reading this.

Must have for any grip! I highly recommend reading this and memorizing it! of course, crews always develop their own slang over time, but this is a great learning source with information you just can't learn on the field.

If you're thinking about getting it, get it. And the Set Electrician's handbook, just in case you need to show up an electric.

There is an immense body of knowledge on how productions operate behind the scenes. I highly recommend it to anyone involved in the film and video industry!
