The 101 Coolest Simple Science Experiments: Awesome Things To Do With Your Parents, Babysitters And Other Adults

Synopsis

Perform Mind-Blowing Science Experiments at Home! You'll have the time of your life conducting these incredible, wacky and fun experiments with your parents, teachers, babysitters and other adults. You'll investigate, answer your questions and expand your knowledge using everyday household items. The Quirky Mommas from the wildly popular Kids Activities Blog and authors of the bestselling 101 Kids Activities That Are the Bestest, Funnest Ever! have done it again with this book of ridiculously amazing, simple science experiments. You can do things both indoors and outdoors. The handy mess meter, preparation times and notes on the level of supervision will keep your parents happy, and you safe. Experimenting is really fun, and you will have a blast being a scientist! You will be so entertained, you might not notice you're also learning important things about the world around you. Some experiments to master:- Balloon-Powered Car- Burst Soap Clou- CD Hovercraft- Creeping Ink- Bendy Bones- Electromagnet- Paper Helicopters- Unbreakable Bubbles Now put on your lab coat and let's get experimenting!

Book Information

Customer Reviews

"The team at Kids Activities Blog are the best at coming up with super fun ways for parents and kids to connect through hands-on play, and this new book is no exception. It has such great ideas to get your kids hypothesizing, concocting and experimenting in their very own

kitchen-turned-science-lab. What's the formula for hands-on fun? Stephanie Morgan, founder of Modern Parents Messy Kids, says the formula is simple: "What's the formula for hands-on fun? This book. The 101 Coolest Simple Science Experiments will have your kids begging to learn more." Stephanie Keeping, founder of Spaceships and Laser Beams

Holly Homer and Rachel Miller are the women behind the bestselling 101 Kids Activities That Are the Bestest, Funnest Ever! They, along with Jamie Harrington, are the team behind Kids Activities Blog (KidsActivitiesBlog.com). They live with their own little scientists in the Dallas-Fort Worth metroplex in Texas.

First week of summer and my 12 year old has been using this book non stop! I love how it's rated inside whether an adult is needed and there's a mess meter. I've hardly had to help which in my book is great. They've had trial and error and my son has even started a science notebook to track his success and tweaks to the experiments. This book is an absolute blast and I'd recommend to anyone!

I was so disappointed in this book. My kids were super excited when I told them about it. As soon as we got it in the mail, we immediately started flipping through the pages and the kids each picked out an experiment to try out. It was a bust. Either the experiment didn't work at all or it did but not as flamboyantly as the book said it would. Also, many of the experiments have very vague instructions. We tried more experiments throughout the summer with the same results. My ten year old son quickly lost interest but my seven year old daughter still likes to try things from time to time. The experiments that did work, and my kids really like, are Bursting Soap Cloud, Marshmallow Molecules, Egg Drop, Quicksand, Spinning Marbles and Aluminum Rocks. We didn't try every experiment as many of them simply didn't appeal to my children.

This book is so interesting! I got it for a friend's kid's birthday present. I liked it so much that I am going to get another copy for myself!

Me and my preschooler love "doing science" and this book is perfect!

Lots of easy and fun activities for my and my 5yr old. Great go to for bonding.

This is an amazing resource. So many cool science activities. My kids and I love it!

Great inexpensive experiments. Using it to interest my 9th grade students in Science.

My kids love this book - easy but impressive science experiments that you can do with ingredients you probably have around the house!
