The Scientific Revolution: The Life And Legacy Of Johannes Kepler

Synopsis

"We do not ask for what useful purpose the birds do sing, for song is their pleasure since they were created for singing. Similarly, we ought not to ask why the human mind troubles to fathom the secrets of the heavens. The diversity of the phenomena of nature is so great and the treasures hidden in the heavens so rich precisely in order that the human mind shall never be lacking in fresh nourishment." - Johannes Kepler

Just trying to define a man who had the qualities of a mathematician, astronomer, philosopher, inventor, and astrologer can prove difficult. But all of that can be ascribed to Johannes Kepler, one of the giants of his era who ushered in the Scientific Revolution and is often considered the first modern scientist. Kepler stood at a moment in time when the intellectual worldview of most in northern Europe was medieval in nature, influenced mostly by spirituality, mysticism, religion, and metaphysics. Kepler, however, was far-thinking in his outlook, taking advantages of the latest technological ideas from the Renaissance and the new translations of Greco-Roman philosophers from out of the Spanish kingdoms and the former-Byzantine Empire. Kepler himself struggled with the seemingly incongruous division between metaphysics and empiricism. By practicing empiricism and coming up with his famous laws of planetary motion, he was forced to defend his positions against a number of important ideas in western philosophy and the contemporary understanding of nature and the cosmos. All the while, Kepler was never able to escape the medieval mind he possessed, and he looked for God in the designs of the cosmos, thus attempting to wed the supernatural to the physical.

Book Information

Audible Audio Edition

Listening Length: 1 hour

Program Type: Audiobook

Version: Unabridged

Publisher: Charles River Editors

Audible.com Release Date: May 21, 2015

Language: English

ASIN: B00Y1V0G4O

Best Sellers Rank: #100 in [Books > Audible Audiobooks > Science > Astronomy](#) #2937

[in Books > Biographies & Memoirs > Professionals & Academics > Scientists](#) #3781

[in Books > Science & Math > Astronomy & Space Science > Astronomy](#)

Customer Reviews

This was helpful for my paper, but not a very easy to understand book. Easy Bib could not find this book.
